HCP omnichannel ecosystem

An example path toward omnichannel

- The effectiveness of personal and NPP tactics are being governed by the silos in which they operate
- An omnichannel approach must be prioritized: Sales, CRM, marketing, and media are unable to reach their full potential of effectiveness
- Competitive advantage: Widen the gap over the next 5 years and increase the barriers for entry for competitors if operating with an omnichannel approach (before competitors figure it out)

The path to omnichannel maturity
